

Week 10 with APT Solar Solutions Final Report

Marlena Branham + Anna Withrow

APT Solar Solutions

APT Solar Solutions offers alternative off-grid solar technology designed for "smart city" applications.

Their groundbreaking **3D lighting fixtures** require just one day of charging to provide illumination for three full weeks, making them ideal for premium landscaping in commercial and residential areas, as well as for farmlands.

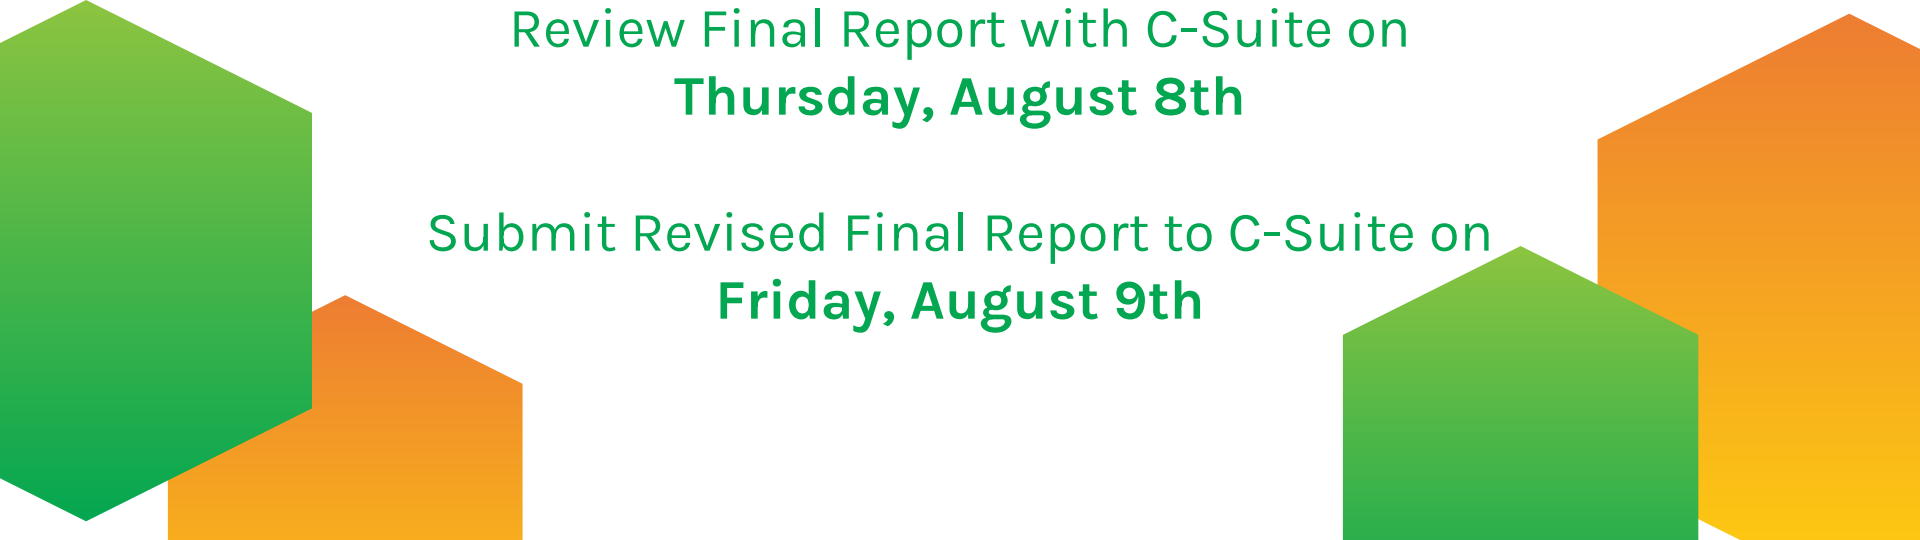

Final Week Tasks

Submit Final Report to C-Suite on
Wednesday, August 7th

Review Final Report with C-Suite on
Thursday, August 8th

Submit Revised Final Report to C-Suite on
Friday, August 9th

Anna's LinkedIn and Blog Progress

Resume Points

- ❖ Identified key performance indicators for solar lighting regions in the US.
- ❖ Analyzed 6+ smart city competitors to discover design trends
- ❖ Worked with APT Solar Solutions to create a five year forecast of new opportunities and potential partnerships.

LinkedIn

Target Audience: Social Media Marketing

Connections: Jamie Ferguson (Domino's),
Audrey Canning (Robin Hills Farms
Marketing), and Barb Authlier (Marketing
Director at The Ark)

168 connections and 156 Post Impressions

Blog

I've published 7 blog posts!

For my blog this week, I wrote about our final distributor list and moving into writing the final report
